Subject: Software Developer - Round Two

Hi Paulo

Thanks for your time yesterday, it was lovely to meet you
As discussed round two of the assessment process is a short assessment as follows,

We would like to invite you to carry out a small task as part of the second-round interview for the position of Software Developer here at CGA.

We are providing the following URL:

<https://demo.flexmms.com/v3/api/incidents/>

The headers to be used in the request are as follows:
'api-key': "SzVIZGUwYzdjMTg1Y2M4LjM2NTM5MzYw",
'Content-Type': 'application/json'

The data parameters needed include:

view: 'detailed'
start: epoch start date (start in 2015)
end: epoch end date (get epoch timestamp of now)

You will need to make a request to this API and you will receive a JSON response which you can parse and display the data nicely in a list view. If you have time, create a pie chart of the various types of incidents in the response (which are just numbers in this instance).

If you could please have your results back to me by Monday 20th I would appreciate it

I'm out of the office for a few days so if you have any issues logging in please mail Rosaenne copied above

Best of luck

Kind regards

Aisling Andrews
CGA Technology
